89 **Staff Listing**

Dear Friends of Agriculture,

As one of New York's major industries, agriculture is a very important part of the state's economy. The wide variety of products produced by our farmers help make New York one of the leading states in a number of agricultural commodities. Through the statistics in this report, we are able to see what is happening to New York agriculture on the ground which makes it possible to see the changes happening year to year as well as any trends that might be developing.

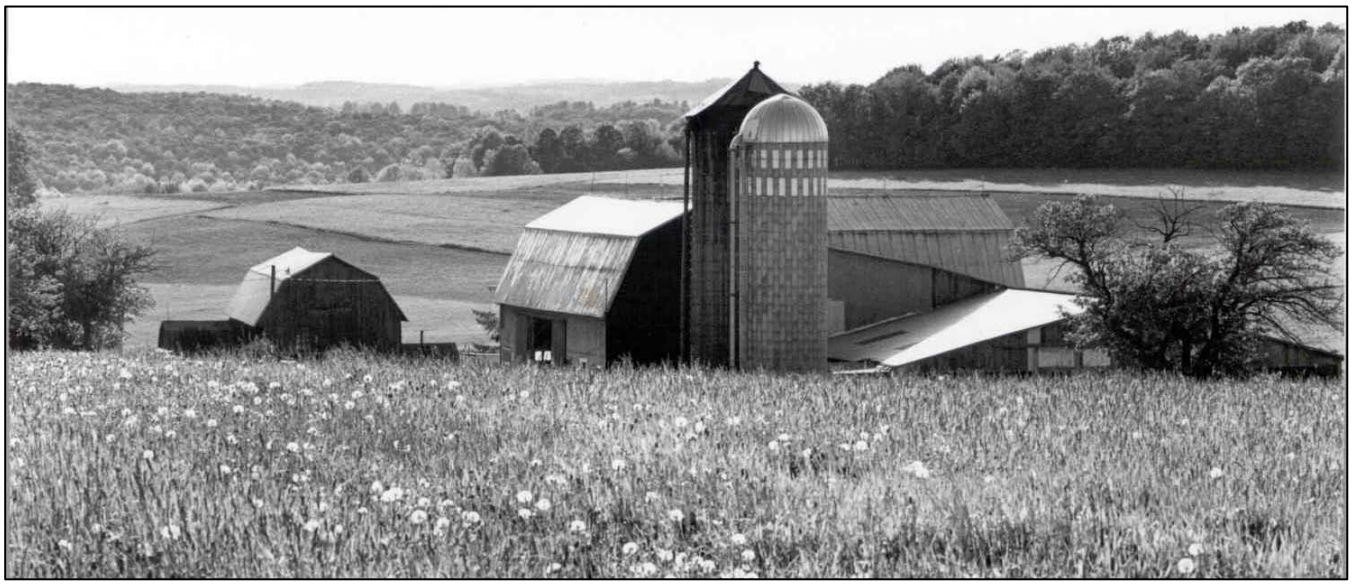

This type of information is invaluable because not only do these statistics give a current status of New York agriculture, but they aid in making business and policy-making decisions for the future. They also provide an understanding of the significant effect agriculture has on the economy and rural communities of New York.

A crucial component of this report is the accurate information provided by the families and businesses that make up our industry. I very much appreciate their attention to that detail as well as their assistance in compiling this report. I look forward to another leading year in New York agriculture.

Sincerely,

Patrick H. Brennan

Patrick H. Brennan
Commissioner

New York is an Agricultural State

Agriculture is important to New York State. Agricultural production returned over $3.6 billion to the farm economy in 2005. About 25 percent of the state's land area, or 7.5 million acres are used by the 35,600 farms to produce a very diverse array of food products. Here are some of the items in which New York ranks high nationally:

LIVESTOCK PRODUCTS

Dairy and animal production in New York provided $2.30 billion to farmers in 2005. That accounts for 63 percent of all cash receipts.

DAIRY PRODUCTS

Milk is New York's leading agricultural product and is produced all across the state. Milk sales account for one-half of total agricultural receipts. Production in 2005 was 11.7 billion pounds with a value of $1.91 billion. New York is the Nation's 3rd leading producer and Wyoming is the State's leading county.

MEAT PRODUCTION

New York livestock producers marketed 246 million pounds of meat animals during 2005 bringing in $190 million in cash receipts. Sales from cattle and calves accounted for $173 million, hogs and pigs returned $13.0 million, and sheep and lambs provided $3.67 million.

POULTRY PRODUCTION

The value of New York eggs, ducks, broilers and turkeys plus the value of sales for other chickens totaled $91.3 million for 2005. Eggs made up $36.5 million of the total followed by broilers at $7.61 million. New York ranks 22nd among all egg producing states.

CROP PRODUCTION

Field crops, fruits and vegetables returned $1.33 billion to New York farmers in 2005.

FRUITS

New York's fruit crop receipts were valued at $243 million in 2005. Apples and grapes lead New York fruit crops in value.

Apples

New York apple production ranks 2nd nationally with receipts worth about $184 million in 2005. Three general areas produce most of the apples: along the southern Lake Ontario shore, along the Hudson Valley, and along the upper Lake Champlain Valley. New York's leading varieties are McIntosh, Empire, Rome, Idared, and Red Delicious.

Grapes

Wine and juice grape production place New York 3rd behind California and Washington. The crop was worth $34.3 million in 2005. Three-fourths of the production was for juice and one-fourth went into wines. The four major producing areas are Lake Erie area, the Finger Lakes, the Hudson Valley and the eastern end of Long Island.

Tart Cherries

Production in New York ranks 4th in the Nation. Production totaled 7.5 million pounds with a value of $3.24 million.

Pears

Production ranked 4th in the nation with 8,500 tons and had a value of $4.09 million.

Strawberries

Strawberries are the 3rd most valuable fruit in New York and places New York 7th in national production. Growers harvested 5.20 million pounds in 2005. The crop returned $8.06 million to growers.

VEGETABLES

The value of vegetables totaled $461 million in 2005. Fresh market vegetable production ranks 7th and processing vegetable production ranks are 6th among all states. Leading crops in New York are cabbage, sweet corn and onions.

Cabbage

New York produced the 2nd largest crop of cabbage in the Nation. Cabbage is principally grown south of Lake Ontario in Monroe, Genesee, Orleans, Ontario, and Niagara counties. New York cabbage is typically stored for sale as fresh during winter months. Value of the fresh market crop in 2005 totaled $67.3 million.

Sweet Corn

Produced statewide, sweet corn had a value of $69.9 million. Concentrations are found in the Lower Hudson Valley and around the Genesee Valley. Production of fresh market sweet corn crop ranked 4th in the nation and was worth $60.5 million. Production of sweet corn for processing ranked 5th in the nation and was worth $9.34 million.

Onions

An important crop with receipts of $49.0 million in 2005. Onions are grown in New York's muck soils in Orange, Orleans, Oswego, Madison and Wayne counties. The state ranked 6th in production for 2005.

Snap Beans

Grown in the Central and Western regions for fresh and processing. The 2005 fresh market and processing crop was valued at $35.8 million. Fresh production accounted for 64 percent of the total value. New York ranks 5th in fresh market production and 2nd in the nation for production of snap beans for processing.

Other Vegetables

Production of **tomatoes** ranked 13th nationally with a value of $21.5 million. Production of **pumpkins** ranked 6th nationally with a value of $21.9 million. Production of **cucumbers** ranked 5th nationally with a value of $15.3 million. Production of **squash** ranked 5th nationally with a value of $29.1 million. Production of **green peas for processing** ranked 4th nationally with a value of $11.4 million. Production of **cauliflower** ranked 3rd nationally with a value of $3.35 million.

FIELD CROPS

New York produces a variety of field crops largely in support of it's dairy industry. Corn, oats and wheat are most widely grown with soybeans steadily increasing in importance. New York ranks 3rd in corn silage production with a value of $227 million. Production of grain corn ranked 19th with a value of $117 million. Soybean production was valued at $43.5 million. The state placed 10th in oat production, 32nd in wheat and 24th for soybeans production. Hay production put New York 22nd and was valued at $282 million in 2005. Most hay is used on farms and its value is realized through sale of milk and livestock. Fall potatoes reached a value of $40.3 million in 2005 and made New York the 11th leading producer.

MAPLE SYRUP

At $7.04 million, New York ranks 2nd behind Vermont in value and 3rd with 245,000 gallons produced behind Vermont and Maine in 2005.

FLORICULTURE CROPS

In 2005, New York floriculture products were valued at $200 million. Bedding and garden plants top the list of commodities. The wholesale value of New York's floriculture output ranks 5th nationally at $200 million. A variety of crops are produced in 24.5 million square feet of covered area and on 963 acres of open ground. Christmas trees provide about $21.3 million of sale.

Economic Indicators

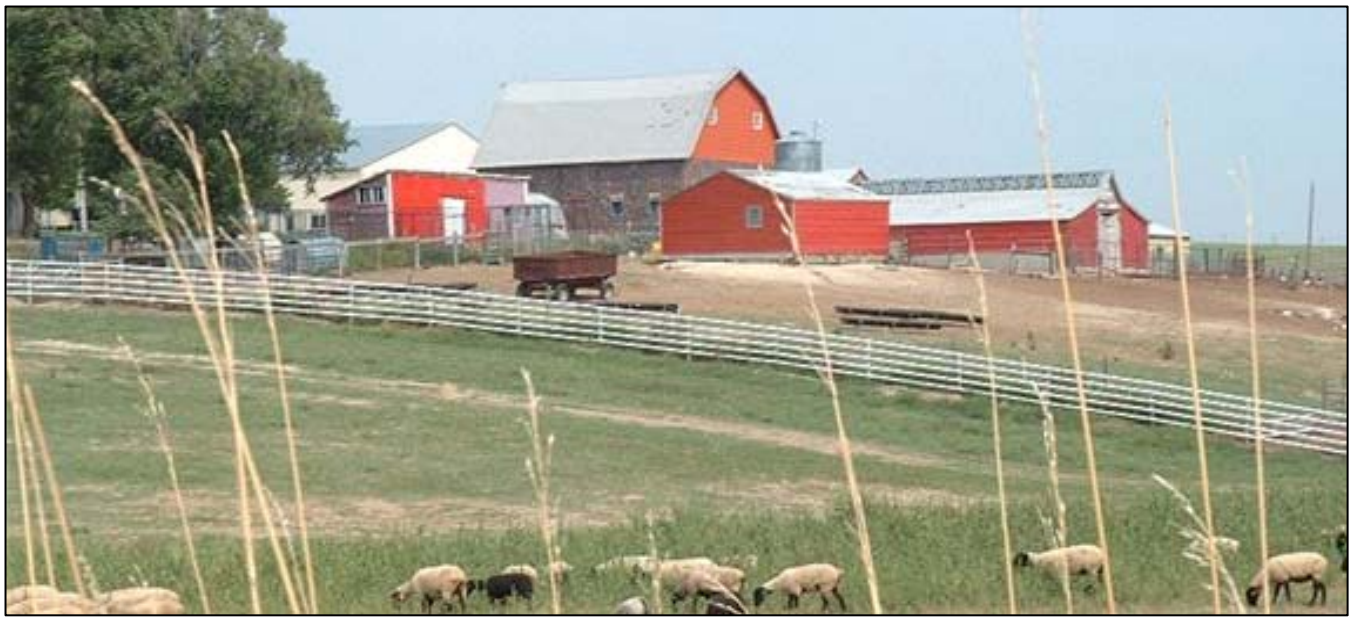

Table 1. **Number of Farms and Land in Farms, by Sales Class, New York, 1997-2005**

Year	Gross Value of Sales			
	$1,000-9,999	$10,000-99,999	$100,000+	Total
	Thousand farms

2001	1.80	2.20	3.66	7.66
2002	1.77	2.20	3.69	7.66
2003	1.78	2.25	3.62	7.65
2004	1.75	2.10	3.75	7.60
2005	1.65	2.10	3.80	7.55

FARM INCOME

State estimates of farm income are prepared annually by the Economic Research Service, U.S. Department of Agriculture (USDA). These estimates are based on USDA's annual Agricultural Resource Management Survey and a variety of existing independent data such as cash receipts, government program payments, property taxes, number of farms, land in farms, farm land values, and inventory changes. Farm income data, are shown in table 5.

NET FARM INCOME UP

New York Net Farm Income increased 15 percent in 2004 to $638 million *(table 3)*. Livestock output value increased 20 percent to $2.30 billion and crop output value increased 6 percent to $1.37 billion. Purchased inputs increased 13 percent to $2.17 billion while direct government payments decreased 49 percent.

FARMS BY SALES CLASS

Of the estimated 35,600 farms in New York in 2005, only 6,400 or 18 percent of all farms had sales of $100,000 or more, but they operated 3.80 million acres or 50 percent of all land in farms. New York farms with sales of less than $10,000 totaled 17,800 or 50 percent of all farms.

FARMS AND FARMLAND UTILIZATION

The number of farms in New York *(places selling $1,000 or more of agricultural products in a year)* totaled 35,600 in 2005, down from 36,000 in 2004. Land in farms totaled 7.55 million acres. Farmland accounts for 25 percent of the State's total land area.

Total cropland stands at 4.85 million acres and accounts for 64 percent of total land operated. Harvested cropland at 3.72 million acres represents 49 percent of total land operated. Field crops such as corn, hay, haylage and greenchop, small grains, potatoes, soybeans and other field crops account for 94.1 percent of the total cropland harvested. Vegetable crops make up 3.4 percent and fruit crops 2.5 percent.

Estimates of farmland utilization are shown in table 2 below. The estimates are based on annual surveys with over 6,000 farms reporting each year.

2005 CASH RECEIPTS INCREASE

Cash receipts from New York farm marketings in 2005 totaled $3.63 billion, up slightly from the 2004 total. Receipts from livestock and poultry products were $2.30 billion. Crop sales increased to $1.33 billion for 2005. Dairy product sales fell to $1.91 billion, over one-half of the total sales.

Crops

FIELD CROPS

The 2005 crop year got off to a good start due to excellent weather conditions during the planting season. The ideal weather encouraged fieldwork and pushed planting progress ahead of last year. Ample moisture at the end of the season allowed grain yields to be good yet prevented farmers from making dry hay.

Grain Corn

New York production is estimated at 57.0 million bushels, down 6 percent from last year. Area for harvest totaled 460,000 acres, down 8 percent from a year ago. Yields averaged a record high 124 bushels per acre, up 2 bushels from 2004. Production was valued at $116 million, down 19 percent from 2004.

Silage Corn

Corn cut for silage totaled 8.84 million tons, an increase of 11 percent from last year. Area for harvest increased 11 percent to 520,000 acres. Yields are estimated at 17.0 tons per acre, the same as a year earlier. Production was valued at $6.48 million, up 11 percent from 2004.

Soybeans

The 2005 soybean crop was estimated at a record high 7.90 million bushels, 18 percent above last year's production. Area harvested, also a record high at 188,000 acres, was up 9 percent from a year ago. Yields averaged 42 bushels per acre, the highest yield on record. The value of the 2005 soybean crop was set at $41.1 million, up 13 percent from the previous year.

Wheat

Production totaled 5.13 million bushels, down 3 percent from the previous year. Harvested acreage, at 95,000 acres, was down 5 percent from 2004. Winter wheat yields averaged 54 bushels per acre, up 1 bushel a year ago. Winter wheat was valued at $15.6 million, up 5 percent from a year ago.

Oats

Production, at 4.05 million bushels, was up 25 percent from the previous year. Area harvested, at 75,000 acres, was up 50 percent from last year. The average yield, at 54 bushels per acre, was down 9 bushels from a year ago. Oat production was valued at $6.48 million, up 11 percent from 2004.

Barley

Production of barley in New York totaled 735,000 bushels, up 39 percent from a year earlier. Acreage harvested for grain totaled 15,000 acres, up 5,000 acres from 2004. The average yield per acre, at 49 bushels, was down 4 bushels from last year. Barley production was valued at $1.40 million, up 29 percent from the 2004 value.

All Dry Hay

Production was placed at a new record low 2.63 million tons, down 10 percent from last year's 2.92 million tons. Acreage harvested for dry hay during 2005 increased 30 percent to 1.65 million acres. Yield, at 1.59 tons per acre, was 31 percent below a year ago. Value of production, at $282 million, was down 13 percent from a year ago.

Alfalfa Dry Hay

New York production of alfalfa dry hay was estimated at 945,000 tons, down 28 percent from last year's crop of 1.32 million tons. Area harvested, at 450,000 acres, was 4 percent below last year. Yields averaged 2.10 tons per acre, 25 percent below last year. Alfalfa dry hay production was valued at $123 million, down 33 percent from the 2004 value of $183 million.

Potatoes

Production totaled 5.23 million hundredweight (cwt.), up 1 percent from the 5.18 million cwt. produced in 2004. Harvested acreage totaled 20,100 acres, up 900 acres from last year. Yields averaged 260 cwt. per acre, down 10 cwt. from a year ago. The value of potatoes, at $65.3 million, was up 52 percent from 2004.

Dry Beans

Production totaled 282,000 cwt., up 14 percent from 2004. Acres harvested totaled 23,000 acres, down 500 acres from a year earlier. The average yield, at 1,230 pounds per acre, was up 180 cwt. from last year. Dry beans were valued at $6.20 million, down 10 percent from the 2004 value of $6.89 million.

2005 CROP SUMMARY

April

Field work was off to a slow start due to heavy rainfall combined with snow melt which caused flooding. After the water receded, planting activities progressed rapidly as unseasonable warmth and winds dried soils. Oats seeding and corn planting got underway. Potato planting was started. Spring pruning was in full swing in the apple orchards. Warmer weather and winds at the end of the month enabled pastures to start greening up.

May

Fieldwork continued at a furious pace despite wetness early in the month. Grapes were budding despite winter damage. Corn planting was nearly complete, soybeans were two-thirds complete, potatoes were one-half complete and oats seeding neared completion. Vegetable planting was nearly complete. Soil moisture averaged adequate to surplus.

June

Corn and soybean plantings were complete and showed great progress. Alfalfa first cutting was three-quarters complete. Dry Bean planting neared completion. Grapes were in bloom throughout the Lake Erie Grape Belt. Strawberry harvest began.

July

Above normal temperatures and ample moisture enabled fieldwork. Oats harvesting was underway. Winter wheat was one-half harvested. The second cutting of alfalfa was two-thirds complete. Summer squash, lettuce, beets and onions were harvested and sent to market. Pasture conditions reflected slow re-growth.

August

The dry period from early to mid-month gave way to rainfall from end-of-month tropical storms and residuals from hurricanes. Beets and potatoes were being harvested. Corn was rated good to excellent. Oats were 95 percent harvested. Winter wheat harvest was complete. The second cutting of alfalfa was 94 percent complete.

September

Warm, humid weather conditions marked the beginning of the month. Remnants of hurricane Katrina and tropical storm Ophelia during early to mid-month brought heavy rain to much of the region. Soybeans continued to look good. Corn volume was good, ears varied. Potato digging was two-thirds complete. Dry beans were 30 percent harvested. Corn for grain harvest began. Corn silage harvest was underway.

October

October brought wet weather beginning with the remnants of hurricane Rita. Corn silage harvest was nearly complete during the month and grain harvest continued despite the wet fields. Dry bean and soybean harvest was well underway. Apples fell from the trees in heavy rains that also interrupted grape harvest. Cabbage, pumpkin and squash harvesting neared completion.

NEW YORK FEED GRAIN DEFICIT IN 2005

New York feed grain production *(corn, oats, barley)* in 2005 was 3 percent below production in 2004, and 3 percent above the 10 year average. The quantity of grain fed during 2005 increased by less than 1 percent from a year earlier and was 2 percent below the 10 year average. The decreases in grain fed are primarily attributed to a decreased number of dairy cows in the state on average during the year when compared to 2004 and the 10 year average number of cows. The increase in grain production from a year earlier is primarily due to a record high yield for corn.

Feed grain produced in 2005 met 84 percent of the State's feeding requirements. The feed grain deficit fluctuates widely depending primarily on the level of corn produced. Over the past ten years, New York farmers have produced on average 80 percent of the feed needed for the diary, livestock, and poultry industries in the state.

Table 13. FEED GRAIN DEFICIT: New York, 1996-2005

Year	Quantity Produced	Quantity Fed	Quantity of Deficit

VEGETABLES

In 2005, New York saw a spring that started out cool and dry. The summer continued the drought and was also hotter than normal. The dry weather reduced yields on crops like onions, but the hot weather was good for crops that like the heat, such as tomatoes and bell peppers. The fall of 2005 started out dry and ended up wet, with unharvested crops like pumpkins and squash left in the fields.

The wet fall weather also affected sales at farm market stands. However, prices for any crops were above 2004, despite the weather conditions.

The value of all New York vegetable production in 2005 totaled $340 million. New York ranked sixth in the nation for the value of principle fresh market vegetables.

2004	65.5	63.3	330.2	40.1
2005	65.8	62.9	326.0	40.4

1/ 2005 figures are not comparable to 2002 and 2003.
Cabbage for kraut not included for 2002 and 2003.

The value of the Empire State's principle fresh market vegetables totaled $300 million this year. Fresh market production in 2005 was estimated at 14.6 million hundredweight (cwt.). Planted acreage increased from 82,200 acres in 2004 to 82,900 acres in 2005.

Processing vegetables were valued at $40.4 million in 2005 and production totaled 326 thousand tons.

Onions

New York onion yields averaged 280 cwt. per acre, 120 cwt. lower than last year. Year 2005 production is estimated at 3.81 million cwt., a 27 percent decrease from last year. Value is down 15 percent, for a total of $45.7 million.

Cabbage

New York's fresh market cabbage production for 2005, estimated at 4.56 million cwt., is up 23 percent from 2004 production of 3.71 million cwt. New York ranked second in the nation for fresh market cabbage production in 2005.

Pumpkins

Pumpkins showed a value of $21.9 million. There were 5,300 acres harvested for a production of 795 thousand cwt. Value of production in 2005 decreased 14 percent from 2004. Total value for 2005 was $21.9 million.

Snap Beans

The value of the 2005 New York fresh market snap bean crop was fifth highest in the nation at $23.0 million. Total production was 300,000 cwt., up 58 percent from last year due to more acres harvested and much higher yields.

Green Peas

The value of processed green peas fell 3 percent. Production totaled 29,660 tons and total value ended up at $11.4 million.

Sweet Corn

Sweet corn planted acreage for processing stayed about the same at 19,500 acres. However, harvested acreage fell to 17,600 acres, 1,400 acres less than 2004. Yield was higher at 6.6 tons per acre. Total value was $9.3 million a 9 percent increase over 2004.

FRUIT

The value of New York's 2005 tree fruit and grape production totaled $229 million, down 11 percent from the 2004 value. The value of utilized production was below the previous year for all fruits except grapes, and sweet cherries.

Apples

The 2005 crop in New York was down 19 percent to 1.04 billion pounds. This year's value of utilized apple production, based on packinghouse door equivalent returns, totaled $170 million. New York ranks second in apple production behind Washington.

Grapes

Production in New York increased 25 percent from 2004 to 178,000 tons. Fresh grapes totaled 3,000 tons while 175,000 tons were crushed by wineries and processors. Grapes utilized for juice accounted for 71 percent of the total grapes processed with the remaining 29 percent going for wine.

The value of the 2005 grape crop is estimated at $34.3 million, 5 percent above the 2004 crop value. New York ranked third in grape production behind California and Washington

Tart Cherries

New York's tart cherry crop is estimated at 7.5 million pounds, down 30 percent from the 2004 crop of 10.7 million pounds. The value of utilized production is estimated at $3.24 million.

Sweet Cherries

New York sweet cherry production, at 800 tons, is down 11 percent from the 900 tons produced in 2004. The 2005 crop is valued at $1.27 million compared to $1.25 million a year ago.

Peaches

Peach production for the Empire State is placed at 4,250 tons, down 29 percent from the 2004 level. The value of the 2005 crop, at $2.83 million, down 33 percent from 2004.

Pears

Production of pears in New York is estimated at 8,500 tons, down 48 percent from the 2004 output of 16,500 tons. The 2005 crop is valued at $4.09 million, down 24 percent from 2004. New York ranks fourth nationally in pear production.

Strawberries

Production in New York was down 20 percent from 2004 to 5.20 million pounds. The value of utilized production is estimated at $8.06 million, down 23 percent from the $10.4 million in 2004. New York ranks seventh in strawberry production. Nationally, the strawberry crop for 2005 was placed at 2.32 billion pounds, up 5 percent from 2004.

Blueberries

Production of blueberries for the Empire State was placed at 1.50 million pounds. The 2005 crop is valued at $1.96 million. This is a decrease of 16 percent from $2.32 million in 2004. The U.S. estimate for blueberries is 342 million pounds, up 24 percent from the 275 million pounds produced in 2004.

Red Raspberries

Production totaled 1.40 million pounds, a decrease of 26 percent from 2004. Acreage harvested remained at 450 acres. The value of the crop also decreased to 3.40 million dollars.

FLORICULTURE

New York floriculture production ranked fifth in the nation for total commercial sales in 2005. Value of sales increased from a year earlier for bedding and garden plants and potted flowering plants. The overall value of commercial sales increased 10 percent to $200 million. Bedding and garden plants continued to be the highest component of the total value of sales at $111 million. Potted flowering plants were second with a value of sales of $49.6 million, an increase of 23 percent. Propagative materials ranked third at $11.5 million, an increase of 40 percent from 2004.

The number of commercial growers decreased for the third consecutive year. During 2005, there were 772 growers.

The open ground area used to produce floriculture crops in the state was down approximately 6 percent to 876 acres. Greenhouse space for operators exceeding the $10,000 sales level decreased 2 percent to total 25.0 million square feet in 2005. This decrease pushed the total covered area *(greenhouse plus shade and temporary structures)* down to 25.5 million square feet, 2 percent less than 2004.

Nationally, the total wholesale value of floriculture crops grown by operations exceeding the $100,000 sales level reached $5.08 billion in 2005, up 2 percent from the revised 2004 total. These operations, which comprise 42 percent of all growers, account for 95 percent of the total value of floriculture crops. Bedding and garden plants wholesale value, at $2.61 billion, is the largest contributor to the value of production, up 2 percent from the previous year. Potted flowering plants value, at $809 million, is up 1 percent from 2004. The foliage category is valued at $721 million for 2005. This is up 5 percent from the revised 2004 estimate. Value of cut flowers, at $397 million, is down 4 percent, while cut cultivated greens, at $105 million, is up 2 percent from 2004.

MAPLE

New York maple syrup 2006 production increased 14 percent from 2005. Syrup production is estimated at 253,000 gallons, up from the 222,000 gallons produced in 2005. Only two states, Vermont and Maine, produced more syrup.

The number of taps, 1.53 million, increased 8 percent from last year. Syrup produced per tap averaged 0.165 gallons, up from 0.156 gallons in 2005. The final value of the 2005 crop is $7.04 million.

The season opened on March 7 and closed on April 3. Most producers were able to tap for about one week straight without the temperature fluctuating to an extreme condition. During that one week, most producers experienced a strong sap flow when the weather was favorable. Excellent production during this one favorable week outweighed poor sap flow encountered during the rest of the season. Throughout the entire maple season, the unusual weather pattern made it difficult for sap flow to be consistent. Producers did not receive continuous cold nights and warm days. There was minimal to no snow received during the maple season and tent caterpillars destroyed some of the maple trees in the northeastern and southeastern parts of the State.

Dairy

MILK PRODUCTION HIGHLIGHTS

Pasture conditions throughout most of New York were good from May through September of 2005. A slightly drier summer hurt pasture conditions in some parts of the state. Overall milk production for 2005 was nearly 4 percent above the 2004 level.

Total milk production in New York during 2005, at 12.1 billion pounds, was up 3 percent from the 11.7 billion pounds during 2004. The annual average number of milk cows, at 648,000 head, was down 1 percent from the previous year. Annual output per cow averaged 18,639 pounds, up 5 percent from 2004.

Cash receipts from the sale of New York milk during 2005 totaled $1.91 billion, down 2 percent from the previous year. The $15.90 per hundredweight received for all milk sold by New York farmers was down $.90, or 5 percent, from the $16.80 received in 2004. Marketing totals include whole milk and producer-separated cream sold to plants and dealers as well as milk sold directly to consumers.

New York dairymen used 42 million pounds of milk on their farms during 2005, unchanged from the previous year. About 95 percent of the milk used on farms was fed back to calves. The value of all milk produced, including milk fed back to calves, totaled $1.92 billion, down 2 percent from 2004.

DAIRY PRODUCTS

There were 115 plants producing one or more dairy products during 2005 in New York, 11 percent of the total plants in the nation. Cheese production, excluding cottage cheese, totaled 667 million pounds in 2005, down 5 percent from 2004. New York ranks fourth in cheese production excluding cottage cheese, behind Wisconsin, California, and Idaho respectively, accounting for 7 percent of national production.

Italian cheese production of 370 million pounds, which accounted for 55 percent of New York's total cheese output, decreased 3 percent from 2004.

New York ranks third in the nation in production of Italian cheese with 10 percent of national production. The production of Mozzarella increased to 179 million pounds from 178 million pounds in 2004.

New York continues to lead the nation in the production of all three cottage cheese categories. Creamed cottage cheese production decreased slightly from 2004, cottage cheese curd increased 9 percent, and low-fat cottage cheese increased 7 percent over the previous year. New York output accounted for 30 percent of all low-fat cottage cheese produced nationally in 2005. Butter production decreased 20 percent to 16 million pounds; in addition state-wide yogurt production decreased slightly to 226 million pounds. New York production of standard ice cream totaled 30.0 million gallons, down 4 percent from 2004. Low-fat ice cream production of 5.4 million gallons was 33 percent above the 2004 output. Production of milk sherbet increased 5 percent, while water ice production rose 6 percent.

Livestock and Poultry

LIVESTOCK

New York livestock producers marketed 246 million pounds of meat animals during 2005, up 8 percent from the 2004 total of 228 million pounds. Cattle and calves marketed were up 11 percent from a year earlier. Hogs and pigs were down 13 percent, and sheep and lambs increased 44 percent from the poundage sold in 2004. Meat animal cash receipts, totaling $190 million, were up 31 percent from 2004.

Gross income from livestock during 2005, which includes the sale of meat animals and the value of home consumption, totaled $194 million, up 30 percent from a year earlier. Cattle and calves accounted for 91 percent of this total.

Calf prices, averaging $140.00 per hundred pounds liveweight (cwt.) were up 27 percent from 2004. Cattle prices, at an average of $49.90 per cwt. during 2005, were up 5 percent. Gross income from cattle and calves during 2004 totaled $177 million, up 36 percent from a year earlier.

Hog and pig prices averaged $43.30 per cwt. in 2005, down 1 percent from the previous year. Gross income from hogs and pigs during 2005 totaled $13.3 million, down 13 percent from 2004.

Sheep prices averaged $51.10 per cwt., up 15 percent from 2004. Lamb prices averaged $120.00 per cwt., 5 percent higher than during 2004. Gross income from sheep and lambs during 2005 totaled $3.92 million, up 31 percent from 2004.

HONEY

Honey production from beekeepers with five or more hives in New York totaled 4.38 million pounds during 2005. This total is up 2 percent from the 2004 production of 4.29 million pounds.

The 2005 production was extracted from 60,000 colonies, down 8 percent from the 64,000 colonies in 2004. Honey yield per colony averaged 73 pounds, 9 percent above the 2004 yield. Honey stocks on hand across the State as of December 15, 2005 totaled 2.32 million pounds, an increase of 23 percent from the 1.89 million pounds a year earlier.

Prices received by beekeepers in New York averaged $1.22 per pound for all methods of sale during 2005, 12 percent less than the 2004 average price. Value of honey production for the State in 2005 totaled $5.34 million, compared with $5.92 million in 2004.

1/ For apiaries with 5 or more colonies.

TROUT

New York trout producers sold a total of 132,000 pounds of trout valued at $507,000 during the 12 months ending December 31, 2005. This production, which includes food-size fish, stockers, and fingerlings, was up 4 percent from a year ago.

The 2005 output included 83,000 pounds of food-size trout averaging $3.03 per pound in value, 46,000 pounds of stocker trout averaging $4.49 per pound, and 3,000 pounds of fingerlings averaging $445.00 per 1,000 fish.

Food-size fish averaged 1.0 pounds in weight, while stockers averaged .40 pounds. Total weight of food-size trout sold was down 5 percent from 2004. Total weight of stocker trout was up 21 percent.

POULTRY

The combined value of New York produced eggs, broilers, and turkeys, and the value of sales for other chickens, was $50.5 million for the year ending November 30, 2005. This total is down 30 percent from a year earlier. Of the 2005 combined value, 72 percent was derived from eggs, 15 percent from broilers, and 13 percent from turkeys.

Egg production in New York during the 2005 year totaled 1.19 billion, up 2 percent from a year earlier. Egg prices were lower, decreasing from 61.7 cents in 2004 to 36.8 cents in 2005. The resulting total value of $36.5 million was 39 percent below the 2004 egg production value of $59.8 million.

Broiler production in New York for 2005 at 16.2 million pounds increased 11 percent from a year earlier. The average price per pound increased 2 cents from 2004 to 47 cents in 2005. Value of production for 2005 totaled $7.61 million, up 16 percent from $6.57 million in 2004.

Turkey production in 2005 amounted to 14.0 million pounds, up 2 percent from 2004. The average price of 46 cents per pound was up 3 cents from the 2004 price. Value of production totaled $6.45 million, up 9 percent from the 2004 level.

Other Agricultural Statistics

PRICES

Annual average prices for New York produced agricultural commodities during this year with livestock prices mostly up and crop prices down. Prices for soybeans, corn for grain, oats, barley, and dry beans were down while potatoes and wheat were up. Hay prices were unchanged.

New York beef producers and dairy farmers with animals to sell saw average prices increase from a year earlier. Steers and heifers averaged $72.90 per hundred-weight (cwt.) during the year, up 5 percent from 2004, and slaughter cows also up 1 percent to $47.00 per cwt. over the same period.

The combined price for all slaughter cattle averaged $49.90 per cwt., up 5 percent from 2004. Calf prices increased 27 percent from 2004, up to $140.00 per cwt. for 2005. At the National level, annual average prices for all slaughter cattle combined averaged 5 percent higher in 2005.

New York pork producers saw prices for hogs average $43.30 in 2005, down 1 percent from the previous year. Lamb prices were up 5 percent to $120.00 per cwt.

Table egg prices averaged 60.7 cents per dozen for 2005, down 41percent from 2004. At the U.S. level, hog prices averaged 2 percent higher and lamb prices were up 9 percent from previous year. The National average for table egg prices during 2005 were 38 percent lower than during 2004.

Wholesale milk prices received by New York dairy farmers averaged $15.90 per cwt. during 2005, down 5 percent from 2004, up 21 percent from the 2003 average price.

2005 WEATHER SUMMARY

January

For the third consecutive year January was cooler than the thirty-year mean. January averaged 1.4 degrees cooler than normal. Warm weather prevailed for the first half of the month, but this was outweighed by the cold temperatures that took hold the latter half of the month. An average of 3.89 inches of precipitation was received, which was 130% of the January normal. This was the 15th wettest January in 111 years of record. The snowiest spots were Bennetts Bridge (51 inches) and Sherman (65.5 inches).

February

February averaged 1.7 degrees warmer than normal. The coldest temperature was -24 degrees at Highmarket on the 19th and 20th. An average of 2.12 inches of precipitation fell which was 88% of normal. The snowiest spot was Syracuse with 43.4 inches.

March

March averaged 3.8 degrees cooler than normal. The coldest temperatures were -18 degrees at Highmarket on the 11th and -12 degrees at Chazy on the 10th. An average of 2.74 inches of precipitation fell which was 88% of normal. The snowiest spot was Slide Mountain with 41 inches.

April

April was the warmest April since 1991 and averaged 3 degrees warmer than normal. The coldest temperature was 18 degrees at Big Moose on the 12th and Whitehall on the 21st. The state received an average of 4.77 inches of precipitation, which was 139% of normal. This was the ninth wettest April since records began in 1895.

May

May averaged 3.6 degrees cooler than normal. The coldest temperature was 18 degrees at Highmarket on the 14th. New York received an average of 1.64 inches of precipitation, which was 45% of normal. This was the 7th driest May since records began in 1896. Several places scattered throughout the state collected less than an inch of rain.

June

June was the warmest June on record in New York State. With an average temperature of 69.8 degrees, this June averaged 5.8 degrees warmer than normal. The warmest temperature this month was 97 degrees at Mineola, Troy and Whitehall. Overall the state received an average of 3.58 inches of precipitation, which was 90% of normal.

July

July was the sixth warmest July on record. With an average temperature of 71.9 degrees, this July averaged 3.2 degrees warmer than normal. Precipitation showed a great deal of variability once again. Overall the state received an average of 4.28 inches of precipitation, which was 112% of normal.

August

August was the fourth warmest August on record. With an average temperature of 71.1 degrees, this August averaged 4.4 degrees warmer than normal. Precipitation amounts decreased as you moved from west to east across the state. Overall the state received an average of 4.03 inches of precipitation, which was 104% of normal.

September

September was the third warmest September on record. The average temperature was 64.0 degrees, which was 5.2 degrees warmer than normal. Precipitation amounts were above normal in the north and below normal across the rest of the state. Overall these extremes balanced each other, as the state average rainfall of 4.00 inches was 97% of the monthly normal.

October

October 2005 was the warmest October since 1995. This was the fifth consecutive month that was warmer than normal. The average temperature was 2.4 degrees warmer than normal. Precipitation amounts were of record proportions across northern and eastern New York. The state averaged 8.67 inches of precipitation, which was 249% of normal. This broke the October state record of 8.08 inches set in 1955. These figures also made it the wettest of any month since records began in 1896.

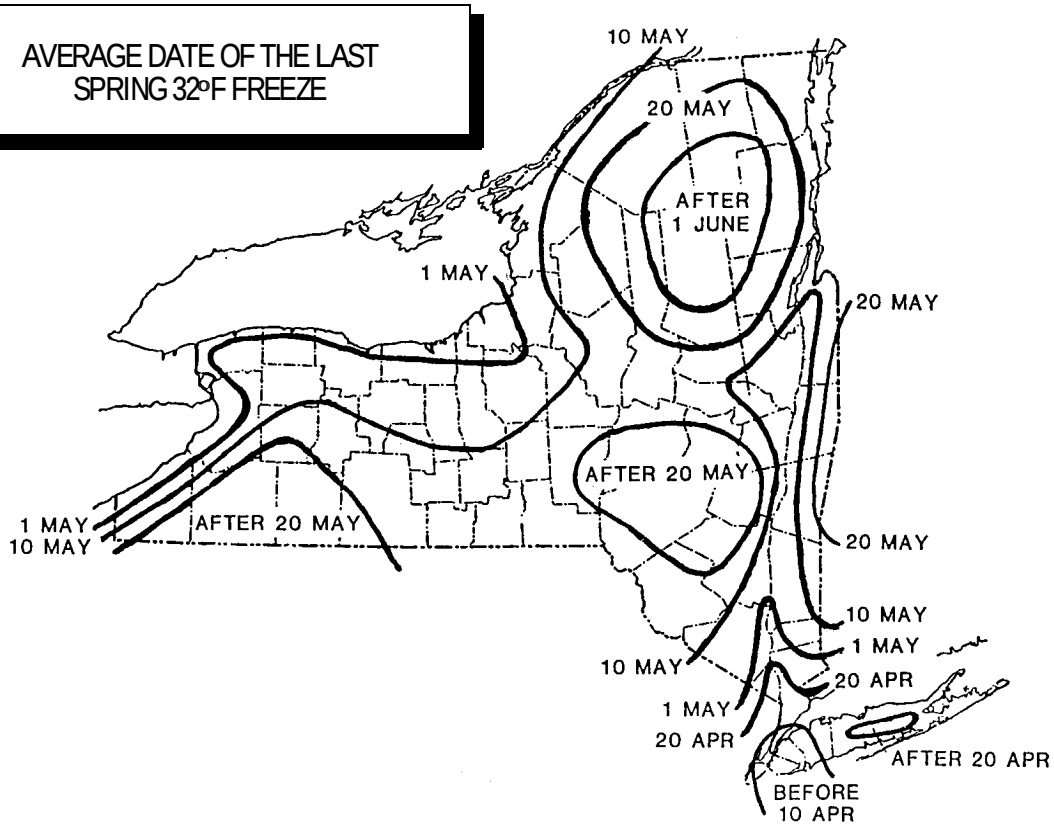

November

November was the sixth consecutive month that was warmer than normal. The average temperature for the month was 3.5 degrees warmer than normal. The state averaged 4.89 inches of precipitation, which was 131% of normal. This was sufficient to make it the ninth wettest November on record and the wettest since 1985.

December

December 2005 broke New York's string of six warmer-than-normal months. This month was 2.1 degrees cooler than normal. Highmarket and Gouverneur both dropped to -22 degrees on the 14th. The state averaged 2.78 inches of precipitation, which was 86% of normal. Highmarket reported 91.4 inches of snow.

1/ Excludes Native American Reservation land.

New York State
COUNTIES BY DISTRICT

County Estimates

County estimates are published annually by the USDA's National Agricultural Statistics Service, New York Field Office for a number of crops, livestock, and farm land use categories. Acreage, yield, and production estimates are made for corn, oats, wheat, and hay. Livestock estimates include January 1 inventory of cattle, beef cows, and milk cows on farms, plus the annual average number of cows and total milk production. Also included are county estimates of the number of farms and total land in farms

Several important sources of information provide the basis for these annual county estimates. Preliminary estimates of crops, farm land uses and livestock numbers are developed from a large scale survey at the end of each year in which over 6,000 farmers across the state are contacted. County acreage information from the Farm Service Agency also receives consideration in preparing several crop estimates. Annual milk production per cow is based on the combined results of milk production surveys conducted monthly throughout the year.

Also, state and federal milk marketing order data by county are used in estimating cow numbers, rates of production, and total milk produced.

Revisions, if necessary, are made after considering data that become available after the original estimates are prepared. These include administrative data such as milk marketing receipts and the Census of Agriculture collected every five years.

County estimates prepared by the USDA's National Agricultural Statistics Service, New York Field Office include allowances for farmers not sampled, non-respondents, and inaccessibles. Milk production totals that exceed reported marketings include a small quantity of milk used on farms where produced. All county level estimates add to state level data shown elsewhere in this publication.
